CONTENT

SI No:	Date :	Name of Experiment:	Page No:	Signature of Staff –In – Charge:
1	01/11/21	Model a simple HTML file related to your native place to demonstrate the usage of different tags	5	
2	01/11/21	Create your bio data by using the html tags for hyperlinks, images, table, frame and fonts . Make it attractive by using the various colour elements. The design should contain a minimum of 3 hyperlinks	7	
3	08/11/21	Create an application form for MCA course in FISAT.	10	
4	22/11/21	Create a HTML page with different types of frames such as floating frame, navigation frame & mixed frame.	16	
5	22/11/21	Analyze CSS by applying the different styles using inline, external & internal style sheets in a HTML file.	22	
6	13/12/21	Create a HTML registration form and to validate the form using JavaScript code	29	
7	03/01/22	Create a HTML page to explain the use of various predefined functions in a string and math objects in JavaScript.	33	
8	03/01/22	Create a HTML page to change the background color for every click of a button using JavaScript Event Handling	42	
9	03/01/22	Generate the calendar using JavaScript code by getting the year and month from the user.	45	
10	10/01/22	Compose Electricity bill from user input based on a given tariff using PHP.	49	
11	10/01/22	Build a PHP code to store name of students in an array and display it using print_r	51	

		function. Sort and Display the same using asort & arsort functions.		
12	10/01/22	Build a PHP code to store name of Indian Cricket players in an array and display the same in HTML table.	53	
13	03/03/22	Using PHP and MySQL, develop a program to accept book information viz. Accession number, title, authors, edition and publisher from a web page and store the information in a database and to search for a book with the title specified by the user and to display the search results with proper headings	55	
14	03/03/22	Using PHP and MySQL, develop a program to collect airline details and display all the airlines between a particular source and destination.	64	

Experiment Number:1**Aim:**

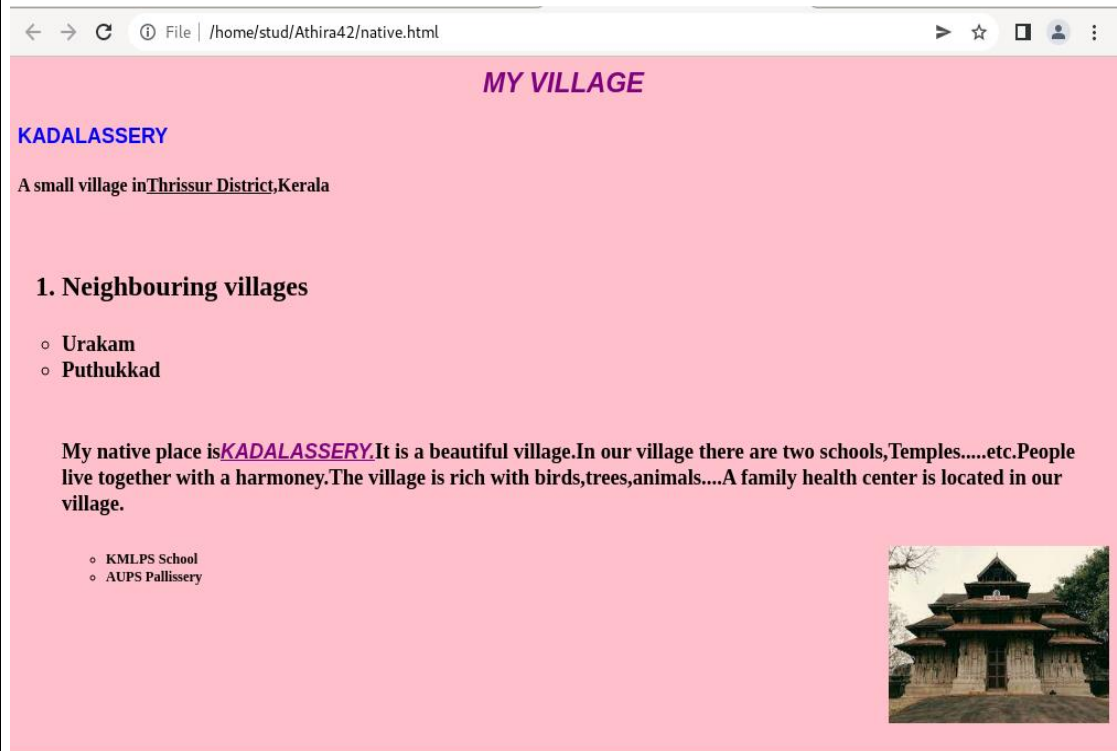

Model a simple HTML file related to your native place to demonstrate the usage of different tags.

Program code:

```
<html>
<head>
<title>Native place</title>
</head>
<body>
<body bgcolor="pink">
<h1><center><font face="arial"size="+2"color="purple"weight="400"><u><i>MY
VILLAGE</i></u></font></center></h1>

Bsc Mathematics

Sakthan Thampuran college,Thrissur

The city of Thrissur is indebted to Sakthan Thampuran, the mighty ruler of erstwhile Cochin state for its unique achievements in the areas of business, culture and education. Even as it has earned the sobriquet "Cultural Capital of Kerala" over the years, it is a home for myriad institutions of excellence, and thanks to him . True, numerous institutions organizations and locations in the city have been named after the great ruler. But among them Sakthan Thampuran College of Mathematics and Arts stands out as a fitting monument to the great ruler. For, it is a striking paradigm of the inextricable link between education and culture. The college celebrates its Silver Jubilee in the academic year 2010 - 2011. The meteoric rise of this college during the past 32 years could be imputed to the enviable helmsmanship of Sri Ajith Kumar Raja, also scion in the royal family. A maths - wizard, his teaching carrier had a modest beginning with only one student. Taking inspiration from his guru Prof.M.K.Menon, he took up on the new path. Later he collaborated with his disciple sri. Joju Tharaken to form an institution in the real form. Today for more than 1.8 lakh of students who are well placed in the different walks of life

SYLLABUS

Various core courses and topics that would be covered in the B.Sc Mathematics course are: Algebra. Differential Calculus & Vector Calculus. Integral Calculus & Trigonometry. Vector Analysis & Geometry. Advanced Calculus. Mathematical Methods.

<a href="https://www.collegedekho.com/courses/mca/">course</a>
<p><i>MCA full form Master of Computer Application is a postgraduate course that
trains the students about the various aspects of computer programs, application
software, computer architecture, operating systems and many more. The duration of
the course is for a period of 2 years
```

MCA course can be an excellent academic choice for in the future because, the MCA graduates would be mainly hired in the IT Industry which is expected to grow by 2.3 % alone in 2021. Similarly, India remains the largest provider of IT Solution and Outsourcing, thus creating a steady flow of jobs for the MCA Graduates.

The MCA admission 2021 will be done on the basis of merit or entrance examination. The minimum MCA course eligibility criteria is a Bachelor's degree in computer application- BCA, or in any related field with mathematics as a compulsory subject in Class 12. The top MCA colleges in India prefer to admit students on the basis of scores from entrance exams.</i></p>

<p id="demo25"></p>
<script>
document.getElementById("demo25").innerHTML = Math.log(1);
</script>
</body>
</html>
```

output:

Experiment Number:8

Aim:

Create a HTML page to change the background color for every click of a button using JavaScript Event Handling

Program code:

```
<!DOCTYPE HTML>
<html>
<head>
<title>
changing the background color
</title>
</head>
<body style = "text-align:center;">
<h1 style = "color:blue;" >
Welcome
</h1>
<button type="button" id="color-button" onclick="changeBg()">Click Here
</button>
<br>
<script>

document.writeln( "Click on button to change the background color");

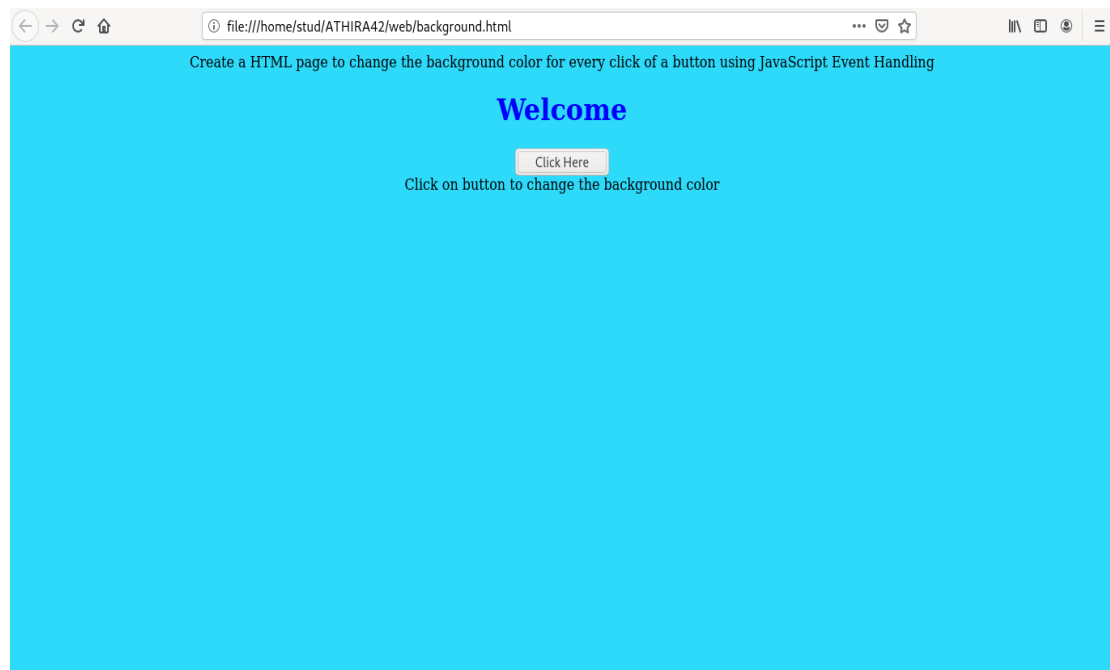

const pageBody = document.querySelector("body");

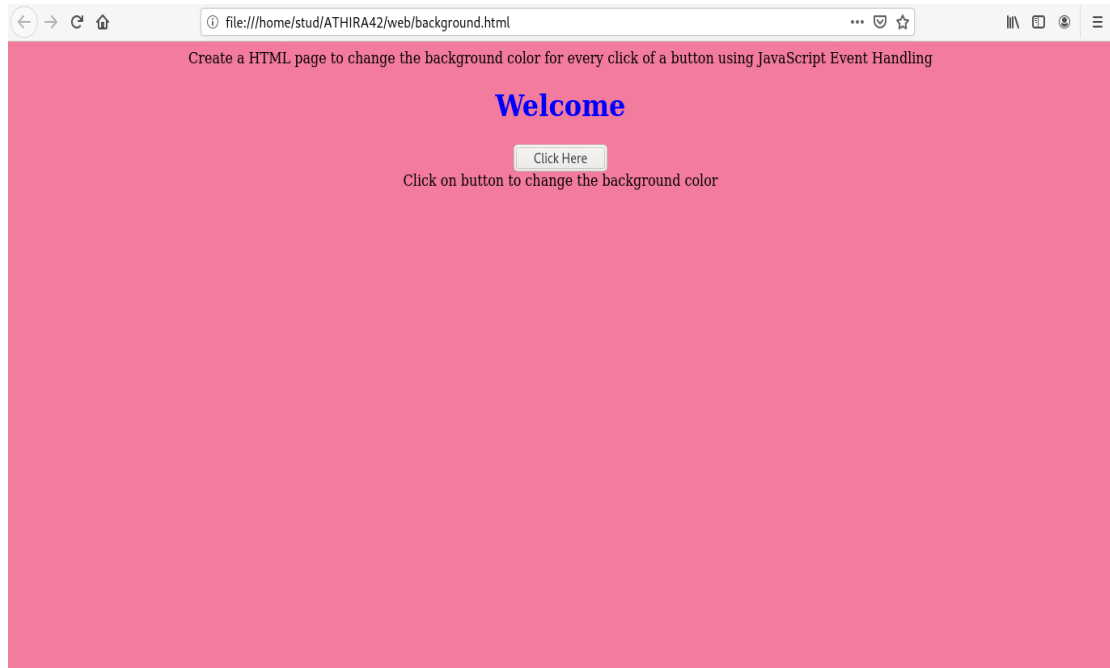

function changeBg()
{
let color = '#'+(Math.random()*0xFFFFFFFF<<0).toString(16);

pageBody.style.background = color;
```

```
}  
</script>  
</body>  
</html>
```

output:

Experiment Number:9**Aim:**

Generate the calendar using JavaScript code by getting the year and month from the user.

Program Code:

```
<!DOCTYPE HTML>
<html>
<head><title>Calendar</title>
<style>
table {
border-collapse: collapse;
}
td, th {
border: 1px solid black;
padding: 3px;

text-align: center;

}
th {
font-weight: bold;
background-color: #E6E6E6;
}
</style>
</head>
<body>
<b><u>CALENDAR</u></b><br>
Enter The year : <input type="number" name="cal" id="cal" /><br>
Enter The Month: <input type="number" name="month" id="month" />
```

```

<br>

<div id="calendar"></div>

<script>
var year = document.getElementById("cal").value;
var month = document.getElementById("month").value;
function getDay(date) {
let day = date.getDay();
if (day == 0) day = 7;
return day - 1;
}

function createCalendar(elem, year, month) {
let mon = month - 1;
let d = new Date(year, mon);
let table =

'<table><tr><th>MON</th><th>TUE</th><th>WED</th><th>THU</t
h><th>FRI</th><th>SAT</th><th>SUN</th></tr><tr>'

for (let i = 0; i < getDay(d); i++) {
table += '<td>*</td>';
}

while (d.getMonth() == mon) {
table += '<td>' + d.getDate() + '</td>';
if (getDay(d) % 7 == 6) {
table += '</tr><tr>';
}
}

```

```
d.setDate(d.getDate() + 1);  
}  
  
if (getDay(d) != 0) {  
  for (let i = getDay(d); i < 7; i++) {  
    table += '<td>*</td>';  
  }  
}  
  
table += '</tr></table>';  
elem.innerHTML = table;  
}  
  
createCalendar(calendar, year, month);  
</script>  
</body>  
</html>
```

Output:**CALENDAR**Enter The year : Enter The Month:

MON	TUE	WED	THU	FRI	SAT	SUN
*	*	1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30	31	*	*

Experiment Number:10

Aim:

Compose Electricity bill from user input based on a given tariff using PHP.

Program Code:

```
<html>
<head>
<title>electricity</title>
</head>

<body>
<form action="calculate.php" method="post">
Name: <input type="text" name="fname">
Consumer no:<input type="number" name="consumer">
No. of units:<input type="number" name="units">

<input type="submit">
</form>
</body>
</html>
```

calculate.php

```
<?php
$p=$_POST["units"];
$s=1.5;
$amount=$s*$p;
echo $amount;
?>
```

Output:

Experiment Number:11

Aim:

Build a PHP code to store name of students in an array and display it using print_r function. Sort and Display the same using asort & arsort functions.

Program Code:

```
<html>
<body>
<?php

$stud=array("abima","ajeeba","abhinav");
print_r($stud);
echo"<br>";

echo"sorted student list";
asort($stud);
print_r($stud);
echo"<br>";

echo"reverse sorted list";
arsort($stud);
print_r($stud);
?>
</body>
</html>
```

Output:

A screenshot of a web browser window. The address bar shows 'localhost/~stud/order.php'. The page content displays three lines of PHP output: 'Array ([0] => abima [1] => ajeeba [2] => abhinav)', 'sorted student listArray ([2] => abhinav [0] => abima [1] => ajeeba)', and 'reverse sorted listArray ([1] => ajeeba [0] => abima [2] => abhinav)'.

```
Array ( [0] => abima [1] => ajeeba [2] => abhinav )
sorted student listArray ( [2] => abhinav [0] => abima [1] => ajeeba )
reverse sorted listArray ( [1] => ajeeba [0] => abima [2] => abhinav )
```

Experiment Number:12**Aim:**

Build a PHP code to store name of Indian Cricket players in an array and display the same in HTML table.

Program code:

```
<!DOCTYPE html>
<html>
<body>
<?php
$Indcricketers= array("Virat Kohli", "M S Dhoni", "Rohit Sharma"); echo "Indian
Cricketers: " .
$Indcricketers[0] . ", " . $Indcricketers[1] . " and" . $Indcricketers[2] . "."; echo
"<h3>INDIAN
CRICKETERS</h3><table border='1'>
<tr>
<th>NO</th>
<th>NAMES</th>
</tr>
<tr>
<td>1</td>
<td>Virat Kohli</td>
</tr>
<tr>
<td>2</td>
<td>M S Dhoni</td>
</tr>
<tr>
```

```
<td>3</td>
<td>Rohit Sharma</td>
</tr>";
?>
</body>
</html>
```

Output:

Experiment Number:13

Aim:

Using PHP and MySQL, develop a program to accept book information viz. Accession number, title, authors, edition and publisher from a web page and store the information in a database and to search for a book with the title specified by the user and to display the search results with proper headings.

Program Code:

BOOKINFO.HTML

```
<?php
$title=$_POST['txt'];
$con=new
mysqli("localhost","fisat","fisat","fisatdb");
if($con==false)
{
echo "Failed to connect";
}
else
{
echo "connected\n";
}
$sql="select * from LIBSYSTEM where
Title='$title'";
if($result=$con->query($sql))
{
if($result->num_rows>0)
```

```

{
while($row=$result->fetch_array())
{ echo
\n'$row[0].':.$row[1].':.$row[2].':.$row[3].':.
$row[4]."\n";}
$result->close();
}else
{ echo "\nCould not found the book"; }

}
else
{ echo "\nError:could not connect"; }
$con->close();
?>

```
